

MUSICIAN'S

"Something special can be created even using simple materials as a play of colors, texture and rhythm of tiles, rare musical instruments, ceramics and decor."

APARTMENT

by Alta Idea Design Studio

The designers tried to avoid stagnation using unusual shades and trying to leverage them, giving the dynamics to the interiors. So, rich blue and noble maroon colors have become the leitmotifs of the Musician's apartment in Kyiv.

The color of the kitchen is called "Silk stone" - a very beautiful calm color that plays interesting shades at different times of the day. Bright green Svartisen chairs add emotion to the calm graphite

background and complement the overall picture with the mood of Northern Scandinavian design, turning out stylish and functional.

The bedroom turned out to be very theatrical, with a large sitting area and a cube clothes room that resembles a dressing room. The designers built it on purpose to hide all things here and free space up from unnecessary details as much as possible.
